PROFESSIONAL SUMMARY

Junior Full-Stack Developer with professional IT experience as a Desktop Support Engineer at 1Life Philippines and hands-on experience developing business-oriented web applications. Experienced in building practical full-stack systems using JavaScript, Node.js, Express.js, Python, Flask, and MySQL. Combines software development skills with real-world IT operations, system troubleshooting, QA testing, and business process experience to create reliable and user-friendly solutions.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), Fetch API, Responsive Design,

Backend: Node.js, Express.js, Python, Flask, REST APIs

Database: MySQL, SQLite

Security: JWT Authentication, bcrypt, Flask Sessions, Werkzeug Password Hashing

Tools & Deployment: Git/GitHub, MySQL Workbench, Visual Studio Code, Firebase, Vercel, Pythonanywhere, Render, Aiven, Looker Studio, Figma

Additional: Visual Basic, C++

PROFESSIONAL EXPERIENCE

Desktop Support Engineer | Aug 2025 - Apr 2026

- Maintained, updated, and troubleshot offline servers and business systems supporting daily operations.
- Provided remote technical support to field Desktop Support Engineers, diagnosing and resolving system-related issues.
- Performed system testing and QA for online and offline updates before deployment.
- Supported medicine delivery operations through dispatch monitoring, delivery coordination, and system-related assistance for field teams.
- Managed and maintained medicine delivery data, inventory information, and operational records to support accurate and timely operations.
- Worked with warehouse, delivery, and homecare teams to identify system issues, understand operational requirements, and resolve workflow bottlenecks.
- Investigated recurring application and system issues and contributed practical technical solutions and workflow improvements.

Internship, Milestone Technological Institution - TESDA | 2024

- Provided technical support for office employees, computers, and IT equipment.
- Performed computer setup, hardware installation, maintenance, and troubleshooting.
- Assisted with network and internet line installation and configuration.

PROJECTS

HUMAN RESOURCE INFORMATION SYSTEM (HRIS) — FULL-STACK

Tech Stack: Node.js, Express.js, MySQL, HTML5, CSS3, Vanilla JavaScript, Fetch API, JWT, bcrypt, ExcelJS, PDFKit, Multer

- Developed a **role-based HRIS** supporting **Employee, Supervisor, and HR/Admin workflows**.
- Built **employee management** features including employee profiles, department information, search, filtering, and record management.
- Implemented **attendance tracking** with time-in/time-out records, late and absence detection, and monthly attendance reports.
- Developed a **multi-step leave management workflow** with **Supervisor and HR approval**.
- Built **employee document management** with per-employee file uploads and records.
- Developed **role-aware dashboards** for company-wide HR analytics, team monitoring, and individual employee summaries.
- Implemented **Excel and PDF report generation** for employee, attendance, and leave records.
- Added **audit logging and dynamic company branding**, with a **responsive interface** optimized for desktop and mobile devices.

ENTERPRISE LEARNING MANAGEMENT SYSTEM (LMS) — FULL-STACK

Tech Stack: Node.js, Express.js, MySQL, HTML, CSS, Vanilla JavaScript, REST APIs

- Built a **role-based learning management system** supporting **HR/Admin, Supervisors, and Trainees**.
- Developed **course and training management** for creating courses, managing training materials, and assigning learning content.
- Implemented **trainee progress tracking** to monitor course completion and learning status.
- Added a **Supervisor Dashboard** for viewing employee training progress and team performance.
- Implemented **role-based authentication and access control** with different capabilities per user role.
- Developed REST API endpoints using **Node.js and Express.js and MySQL** as the system data source.
- Integrated **Google Forms and external assessment links** for training activities.
- Added **AI-assisted training/KPI workflow features** to support employee assessment and evaluation.

INVENTORY & SALES MANAGEMENT SYSTEM (POS) — FULL-STACK

Tech Stack: Python, Flask, SQLite, HTML5, CSS3, JavaScript, QuaggaJS, Flask Sessions, Werkzeug Password Hashing

- Developed a **full-stack inventory and point-of-sale system** for managing **products, sales, stock levels, suppliers, and user activities**.
- Implemented **product, category, supplier, and inventory management** with **stock adjustment** capabilities.
- Built a **POS checkout workflow** with automated **inventory updates and transaction handling**.
- Integrated barcode scanning through USB/Bluetooth scanners and **camera-based scanning using QuaggaJS**.
- Developed an **inventory and sales dashboard** with **low-stock alerts, sales trends, best-selling products, and inventory valuation**.
- Added **transaction and activity audit logs** for tracking sales, voids, stock changes, and user activities.
- Implemented role-based access control separating **Administrator and Cashier** capabilities.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

Datamex College of St. Adeline | 2025
